The Global Retirement Challenge

This breakfast meeting will look at the retirement challenge we face with an ageing population and insufficient savings to ensure everybody can have the lifestyle they desire in retirement.

Alistair Byrne will consider the global retirement puzzle and, in particular, how DC members are facing significant headwinds in the form of lower expected future investment returns, increasing longevity and a growing savings gap. He will also look at a case study on how these challenges are being addressed in the US and will outline some potential options for dealing with such challenges.
